4. (Amended) A method of producing the carbon black of claim 3, comprising reacting a carbon black and a compound of formula R-S_y-R.

Please cancel claims 5 and 6, without prejudice.

II. REMARKS

Preliminary Remarks

Upon entry of the foregoing amendment, claims 1-4 and 7 will be pending, of which claims 1 and 3 are independent. Claims 5 and 6 have been cancelled. Support for the claim amendments may be found in the specification as originally filed (e.g., page 4, line 11).

Consequently, no new matter is believed to have been introduced herein.

As a convenience to the examiner, attached hereto, as an appendix, is a marked-up version of the changes made to the claims by the current amendment. The attached appendix is captioned "Version with markings to show changes made".

Patentability Remarks

35 U.S.C. §112, Second Paragraph

Claim 2 stands rejected under 35 U.S.C. §112, second paragraph, as allegedly being indefinite. Specifically, the examiner asserted that while claim 1 states that the carbon black is bonded to an organic group through a sulfur component, the limitation of claim 2 contradicts this claim, as the sulfur groups are already fully bonded.
